SCOPE OF EXAMINATION

We have completed a financial condition examination of Solstice Benefits, Inc. (the "Company"); a single-state insurer domiciled in Florida. Our examination covered the one-year period of January 1, 2014, through December 31, 2014 and took place primarily in the Company's Plantation, Florida office. The last financial condition examination of the Company by the Florida Office of Insurance Regulation (the "Office") was as of December 31, 2013.

We conducted our examination in accordance with the National Association of Insurance Commissioners ("NAIC") *Financial Condition Examiners Handbook.* The Handbook requires that we plan and perform our examination to evaluate the financial condition, assess corporate governance, identify current and prospective risks of the Company and evaluate system controls and procedures used to mitigate those risks. An examination also includes identifying and evaluating significant risks that could cause an insurer's surplus to be materially misstated both currently and prospectively.

All accounts and activities of the company were considered in accordance with the risk-focused examination process. This may include assessing significant estimates made by management and evaluating management's compliance with Statutory Accounting Principles. The examination does not attest to the fair presentation of the financial statements included herein. If, during the course of the examination an adjustment is identified, the impact of such adjustment will be documented separately following the Company's financial statements.

This examination report includes significant findings of fact, as required by Section 642.319, Florida Statutes (F.S.) and general information about the insurer and its financial condition.

There may be other items identified during the examination that, due to their nature (e.g.

subjective conclusions, proprietary information, etc.) are not included within the examination report but are separately communicated to other regulators and/or the company.
