

DAVID ALTMAIER
COMMISSIONER
FLORIDA OFFICE OF INSURANCE REGULATION

Notice to all Life and Health Insurers

Starting November 14, submissions to OIR's Life and Health Forms and Rates section will be conducted through the Insurance Regulation Filing System (IRFS). Upon launch, all new filings will be submitted through IRFS and filers will be prevented from accessing the "submit new filing" option in IFile. Filings submitted before November 14 will remain in IFile and be accessible through the workbench. Any unsubmitted filings in IFile will need to be submitted before November 14. Additional instructions and directions can be found on the IPortal [home page](#).

IRFS is a streamlined system designed to enhance the filing experience. New features include a spreadsheet-based template for the rates section of the Universal Standardized Data Letter and an option for filers to set a password for individual filings, allowing multiple users to access and work within the filing.

An IRFS introduction presentation will be held during the [OIR Summit](#) on January 15, 2019, and compliance officers who attend will have an opportunity to create test filings with the help of OIR staff. OIR will also be conducting a live webinar for interested parties on November 20, 2018. Additional information regarding the webinar will be posted on the IPortal [home page](#) in the near future.

Have a question? Call (850) 413-5047 or email IRFSHelp@flor.com to contact Life and Health Product Review staff who can assist you with the new filing interface.
